ABOUT

Frontend and product engineer with 4+ years shipping responsive, high-trust experiences across web, mobile, and browser extensions. I build React, Next.js, and TypeScript products from concept to production, including self-custodial wallet, payment, and real-time data flows. I pair frontend depth with full-stack ownership across APIs, databases, and onchain systems, with a bias for clear UX, performance, and maintainable code.

EXPERIENCE

Founding Engineer <i>Vendeor</i>	Aug 2024 - Apr 2025 <i>Nsukka, Enugu</i>
- Shipped a responsive customer storefront and reusable React / Next.js component system directly from product designs. - Owned Paystack checkout, order, and admin analytics flows across the frontend and REST API integration, while contributing to core architecture decisions.	
Software Engineer <i>Lumina</i>	Mar 2023 - May 2024 <i>Nsukka, Enugu</i>
- Co-led the frontend of a Web3 learning platform, building interactive React interfaces and integrating backend APIs and onchain certificate and reward flows. - Developed dashboards for lessons, courses, and analytics; helped establish component standards through code reviews and engineering discussions.	
Software Engineer & Creative Technologist <i>Accave</i>	Jun 2022 - Jul 2024 <i>Abakaliki, Ebonyi</i>
- Co-led an interactive learning platform, translating complex product and content workflows into intuitive cross-device experiences. - Built performant dashboards for content, user journeys, and analytics in close collaboration with product designers and engineers.	

PROJECTS

Nebula <i>Next.js 16, React 19, TypeScript, Stellar, Soroban, PostgreSQL</i>	GitHub • Live
A testnet DeFi vault that deposits XLM into yield strategies and issues a liquid, value-accruing nXLM token.	
Owned the responsive wallet UI, signed deposit and redemption flows, live protocol dashboard, event indexer, and Soroban contracts.	
Kai <i>Currently building Tauri, React 19, TypeScript, Rust, Gemma 4</i>	GitHub
A local-first desktop assistant with private on-device inference, reminders, email triage, and governed tool use.	
Building the responsive React UI, native Tauri bridge, voice notes, model management, approval flows, and cross-platform releases.	
Crypt <i>Next.js, React, TypeScript, Supabase, Stellar SDK, Recharts</i>	GitHub • Live
Parametric SLA escrow for APIs: providers lock USDC on Stellar and subscribers are paid automatically after sustained downtime.	
Designed and built the monitoring dashboard, wallet-based escrow flows, responsive states, and Recharts SLA visualizations.	
Gauntlet <i>Next.js 15, React 19, TypeScript, Tether WDK, QVAC, Convex</i>	GitHub • Live
A World Cup survival pool where players stake USDt through self-custodial wallets and survivors split the pot.	
Built the playable selection, funding, staking, settlement, and transaction-feedback UI, with on-device AI advice via QVAC.	
Aria <i>Plasmo, React, TypeScript, Tailwind, ElevenLabs, Zustand</i>	GitHub • Live
An ambient AI assistant Chrome extension that understands the page and supports a real-time, two-way voice conversation.	
Built the React/TypeScript extension UI and real-time voice flows on the ElevenLabs Conversational AI SDK.	

EDUCATION

B.Sc. Computer Science, University of Nigeria <i>Nsukka, Nigeria</i>	Expected Nov 2026 <i>GPA: 4.73 / 5.00</i>
--	---

SKILLS

Languages: TypeScript / JavaScript, Swift, Kotlin, Rust, HTML5, CSS3 / SCSS, SQL

Frontend & Mobile: React, Next.js, Tailwind CSS, SwiftUI, Jetpack Compose, Plasmo, Vite

Full Stack & Data: Node.js, REST APIs, PostgreSQL, Supabase, React Query, Zustand, Zod

Onchain & Quality: Stellar / Soroban, Tether WDK, wallet integrations, Paystack, Vitest, React Testing Library, Playwright, Git
